TOP SKILLS

Python

TensorFlow

PyTorch

Machine Learning

Data Analysis

Git

Docker

AWS

SUMMARY

Ambitious Computer Science student specialising in AI & ML, with proven experience architecting and deploying seven end-to-end intelligent systems. Skilled in Python, TensorFlow, and PyTorch across the full ML lifecycle — from feature engineering and model training to cloud deployment. A collaborative builder who turns research into production-ready tools; actively seeking an AI/ML internship to drive real-world impact.

EXPERIENCE

Student Researcher

Gayatri Vidya Parishad College of Engineering (Autonomous)

08/2024 – Present • Visakhapatnam, India

- Designed several technical projects within a specialised AI track, attaining over 90% predictive accuracy in modelling assignments.
- Formulated algorithmic solutions for real-world engineering challenges in coordination with cross-functional teams.
- Partnered with faculty members to develop technical course materials for a cohort of 60+ students.

SELECTED PROJECTS

KrishiMitra

AI-Powered Agricultural Insights.

Built a data pipeline and predictive models to analyse environmental inputs and deliver crop recommendations; applied feature engineering, model evaluation, and relevance-based suggestion logic.

Tech: Python, Pandas, Scikit-Learn, TensorFlow **Impact:** Enhanced decision accuracy for users by 15%.

Smart File Sorter v2.0

Automated File Organisation Tool.

Streamlined the categorisation of 1,000+ mixed files using Python-based pattern recognition and rule-based ML heuristics, cutting manual management time by ~90%.

Tech: Python, Regex, file I/O automation

Auto Typer

Typing Simulation Software.

Engineered a high-fidelity auto-typing simulator with variable timing and input patterns to replicate human behaviour for interface testing; attaining 99% human-like accuracy.

Tech: Python, automation libraries, timing algorithms

Career Vision

Intelligent Career Guidance Engine.

Architected a recommendation engine processing 15+ profile data points to produce personalised career paths and job matches.

Tech: Python, feature engineering, recommendation algorithms **Impact:** Boosted recommendation relevance by 20% in pilot testing.

Gamified Environmental Awareness

Launched an interactive gamified platform to champion sustainability; amplified user engagement in eco-friendly practices by 30% through incentive-driven mechanics.

Tech: Web frontend, backend logic, gamification design

Library Management System

Developed a robust inventory and operations system managing 500+ items; reduced book check-in/out errors by 25% through structured database schema and backend workflows.

Tech: Python, SQL/DB design, CRUD APIs

Study Search AI

Constructed an AI-powered study material discovery engine using custom ranking algorithms and NLP-based relevance scoring to surface the most pertinent educational resources; elevated retrieval relevance scores by 18%.

Tech: Information retrieval, NLP, ranking algorithms, Python

EDUCATION

BTech: CSE (AI & ML)

Gayatri Vidya Parishad College of Engineering (Autonomous)

08/2024 – 2028 (Expected) • Visakhapatnam, India

CERTIFICATIONS

- Digital Application Fundamentals (STEM) | NASSCOM
- Introduction to Generative AI | IBM
- AI-ML Virtual Internship | EduSkills x Google
- Python for Data Science | NPTEL
- Programming, Data Structures & Algorithms | NPTEL
- Oracle Cloud: GenAI Professional 2025 | Oracle
- Oracle Cloud: AI Foundations Associate 2025 | Oracle
- FutureSkills Prime Skilling Initiative | MeitY
- Google Developer Badges: Image Search, Object Detection, Image Classification, TensorFlow

TECHNICAL SKILLS

Languages

Python; C++; Java; JavaScript; C

AI / ML / DL

Machine Learning; Deep Learning; Generative AI; Neural Networks; Model Training; Model Evaluation; Feature Engineering

NLP & Vision

Natural Language Processing; Computer Vision; Hugging Face Transformers

Frameworks & Libs

TensorFlow; PyTorch; Scikit-Learn; Pandas; NumPy; Matplotlib; Seaborn; Plotly

Data & Storage

PostgreSQL; MySQL; MongoDB; Elasticsearch; Redis

Deploy & Cloud

Docker; Docker Compose; Kubernetes (basic); AWS; GCP; CI/CD (GitHub Actions)

APIs & Web

REST APIs (Flask, FastAPI); React.js; JSON; OAuth

Tools & Platforms

Git; GitHub; Linux; Jupyter Notebook; VS Code; Oracle

Competencies

Information Retrieval; Algorithm Design; Problem Solving; Team Collaboration; Quantitative Reasoning

HOBBIES & INTERESTS

- Minecraft Modpack Development & Game Systems Experimentation
- Exploring Emerging AI Tools & Technologies
- Technology Prototyping and Developer Tool Exploration
- Competitive Team Sports
- Digital Photography
