SUMMARY

Highly motivated Computer Science student specializing in Artificial Intelligence and Neural Networks at Gayatri Vidya Parishad College of Engineering. Proficient in Python and data analytics, with a proven track record of architecting seven end-to-end intelligent systems. Adept at translating complex theoretical models into functional engineering solutions through effective teamwork and structured problem-solving.

EXPERIENCE

Student Researcher

Gayatri Vidya Parishad College of Engineering (Autonomous)

08/2024 - Current • Visakhapatnam, India

- Designed several technical projects within a specialized AI track, achieving over 90% predictive accuracy in modeling assignments.
- Partnered with cross-functional teams to design algorithmic solutions for real-world engineering challenges.
- Collaborated with faculty members to curate technical course materials for a cohort of 60+ students.
- Conducted research across digital repositories to integrate modern machine learning frameworks into academic coursework.

EDUCATION

BTech: CSE (AI & ML)

Gayatri Vidya Parishad College of Engineering (Autonomous)

08/2024 - 2028 (Expected) • Visakhapatnam, India

CERTIFICATIONS

- **Digital Application Fundamentals (STEM)** | NASSCOM
- **Introduction to Generative AI** | IBM
- **AI-ML Virtual Internship** | EduSkills × Google

SKILLS

Programming: Python, Java, JavaScript, C++, C

AI / ML: Machine Learning, Artificial Intelligence, Generative AI, Deep Learning, Natural Language Processing (NLP), Computer Vision, TensorFlow, Scikit-Learn, Model Training, Model Evaluation

Data & Concepts: Pandas, NumPy, Matplotlib, Data Analysis, Information Retrieval, Feature Engineering, Algorithm Design, Quantum Fundamentals

Tools & Platforms: Git, GitHub, Linux, Oracle, Jupyter Notebook, Automation, React.js

Competencies: Problem Solving, Critical Thinking, Team Collaboration, Quantitative Reasoning, Computer Science Fundamentals

PROJECTS

KrishiMitra

AI-Powered Agricultural Insights.

- Constructed an intelligent agricultural platform that analyzes environmental data to provide crop recommendations, optimizing decision accuracy for users.

Smart File Sorter v2.0

Automated File Organization Tool.

- Automated the categorization of over 1,000 mixed files using Python-based pattern recognition, reducing manual management time by 90%.

Auto Typer

Typing Simulation Software.

- Created a high-fidelity auto-typing tool with randomized delays, achieving 99% human-like accuracy to navigate interface restrictions.

Career Vision

Intelligent Career Guidance Engine.

- Developed a comprehensive guidance engine processing 15+ data points per profile to generate personalized career paths and job recommendations.

Gamified Environmental Awareness

- Pioneered an interactive platform promoting sustainability through gamification, combining technical logic with social impact to engage users in eco-friendly practices.

Library Management System

- **Python for Data Science** | NPTEL
- **Programming, Data Structures, & Algorithms** | NPTEL
- **Oracle Cloud: GenAI Professional 2025** | Oracle
- **Oracle Cloud: AI Foundations Associate 2025** | Oracle
- **FutureSkills Prime Skilling Initiative** | MeitY
- **Google Developer Badges:** Image Search, Advanced Object Detection, Image Classification, TensorFlow.

- Programmed a robust system handling inventory for 500+ items and user operations by applying database design and backend logic.

Study Search AI

- Integrated AI-powered search functionalities into a discovery tool, assisting users in efficiently exploring and ranking educational study materials.

HOBBIES AND INTERESTS

- Competitive Sports • Photography
- Music Production • Technical Literature
- Minecraft Development • New Technologies
